

INSTRUCTION

You have 2 options: iOS or android:
Connect to your google play or iOS iTunes and
download **Popguide**.(1)

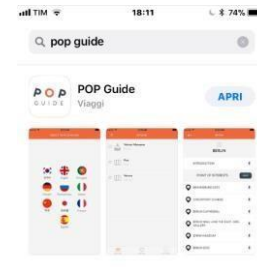

Once installed, (2) open the app and place your screen
over (3) the QR code or insert the password and the
user name. **You will receive the access credentials
codes by e-mail at the moment of reservation.**

The app will open automatically and (4) then you can
choose the language that you prefer. Please download
the excursion recorded on your device in order to
install the audio commentaries (5).

Please don't forget to install the app before to start the tour.
**This app won't use up any data connection as it runs on gps
only.**

**This app is TOTALLY independent from an eventual app of your
operator. So, you must download it as explained above to enjoy
the tour.**

How it works

When you start the excursion.

Don't forget to click on the **autoplay** function to start the audio commentaries (the orange button on the right side).

The audio commentary starts automatically close to the point of interest and a picture will appear on your device screen.

Just touch on localization point and the picture of the mentioned attraction will appear on your device.

Remember that, with this unique app you can enjoy a full preview of the special commentaries created to have an unforgettable experience.

If you have any problems, don't worry, our staff is available to help you.
